Academic Year: 2025-26	Report On Treeplantation & Garbage Collection	Term I/II

Department: NSS Cell PCCOER (BCA)

Date: 18/07/2025

“Report on Tree plantation & Garbage Collection”

<u>Organized by:</u>	TEAM NSS PCCOER
<u>Participants:</u>	NSS Program team & Volunteers
<u>Location:</u>	Naneghat, Tq. Junnar Dist. Pune.
<u>Event Date:</u>	18th July 2025
<u>Organizing Team:</u>	Members of NSS, PCCOER

Objectives of the Event:

1. **Promote Environmental Awareness & Sustainability:** To educate the community on the importance of trees and waste management, highlighting their role in preserving ecological balance and reducing environmental degradation.
2. **Enhance Green Spaces & Reduce Pollution:** To engage in tree plantation to increase green cover, improve air quality, and actively reduce plastic and non-biodegradable waste through organized garbage collection.
3. **Encourage Community Involvement & Long-Term Responsibility:** To inspire local communities and institutions to participate in environmental conservation, fostering a sense of collective responsibility for a greener, more sustainable future.

Content and Schedule in detail

On 18th July 2025, a group of 50 enthusiastic NSS (National Service Scheme) volunteers gathered at the picturesque location of Naneghat in Junnar, Pune, to participate in an impactful event aimed at giving back to nature. The purpose of the event was simple but powerful: **plant trees** to nurture the environment and **clean up the area** by collecting garbage that threatens the local ecosystem. The event was part of a broader initiative to encourage community participation in environmental conservation and create a lasting, positive impact on the surrounding area.

Activities Conducted

1. **Tree Plantation**

The volunteers, energized by their mission, got to work planting **50 trees** in areas that needed some green love. The trees chosen were native species, ensuring they would thrive in the local soil and climate. This small yet meaningful effort aimed to restore the natural beauty of Naneghat, contribute to cleaner air, and support local wildlife.

2. **Garbage Collection**

In parallel, the group split into teams to comb through the area, collecting nearly **10 large bags of garbage**. The waste ranged from plastic bottles to wrappers, much of it littered around the trekking paths and scenic spots. With each piece of trash collected, the volunteers felt a deeper sense of responsibility, not just for Naneghat, but for the planet as a whole.

Conclusion

The tree plantation and garbage collection event turned out to be a successful and heartwarming day of environmental service. By planting 50 trees and collecting 10 bags of garbage, the NSS volunteers made a noticeable impact on the landscape, and more importantly, they helped raise awareness about the importance of taking care of our environment. The event wasn't just about planting trees or picking up trash—it was about **teaching everyone to take responsibility for protecting nature.**

The enthusiasm, teamwork, and sense of purpose displayed by the volunteers were inspiring. This initiative serves as a reminder that each of us can do our part in preserving the environment. It's about taking small actions together to make a big difference. With events like these, we hope to continue spreading awareness, encouraging sustainable habits, and motivating others to help keep our world green and clean.

The success of this event shows that when people come together with a shared goal, they can truly make an impact. Here's to many more such events that not only nurture the environment but also strengthen our connection to it.
