Report on: Getting Ready for IT Industry

Date: 8August 2025

Time: 1:00 PM

Venue: 5th floor, jr. College building

Organized By: Department of BCA - PCCOER

The BCA Department at Pimpri Chinchwad College of Engineering & Research hosted a guest lecture on the subject of "How to Become Job Ready for the IT Industry" on August 8, 2025. The location of the session was S.B. Patil Junior College. Mr. Manoj Kulkarni, the founder of Knowletive Services, spoke at the event and gave the students insightful advice.

Under the direction and coordination of Harshada Ma'am, the session was planned, and her assistance was crucial to its successful completion. With a warm welcome, Saloni Nalawade took the mic to address the audience and explain the event's goal. Following that, Mr. Manoj Kulkarni received congratulations and was formally welcomed as the guest speaker. In her speech to the students, Professor Harshada Deshpande underlined the value of ongoing education and industry readiness.

In an interesting and participatory session, Mr. Kulkarni discussed expectations from the IT industry as well as real-world challenges. He covered a wide range of crucial subjects, including practical instruction, evaluations of LinkedIn profiles and resumes, technical and HR mock interviews, peer-to-peer feedback, placement readiness assessments, and gamified learning techniques. For students preparing for careers in the tech industry, his session offered insightful commentary and useful guidance.

Neeraj Athwal gave the vote of thanks at the conclusion of the session, thanking the faculty, students, and guest speaker for their support and involvement. The students benefited greatly from the event, which ended on a positive note by raising their awareness and readiness for the IT industry.

All in all, the session was very successful and educational. It gave students clarity on how to enter and succeed in the cutthroat IT industry and encouraged them to concentrate on developing practical skills. In order to close the gap between academic learning and industry expectations, the department plans to keep holding these kinds of events.
