Civil Department's Magazine

"Civil-olve"

A.Y. 2025-26 Term-II

From HOD Desk

It gives me immense pleasure to present to you the latest edition of our Civil Engineering e-magazine, *Civil-olve*. The name itself reflects our vision- Civil Engineering is not just about structures and systems, but about continuous evolution. As the world faces new challenges in sustainability, resilience, and innovation, our discipline must evolve to meet them with creativity and responsibility.

This magazine is a platform where tradition meets transformation. It captures the spirit of our department rooted in strong fundamentals yet constantly adapting to modern technologies, interdisciplinary approaches, and global standards. Through articles, research highlights, student contributions, and creative expressions, *Civil-olve* embodies the journey of civil engineering from its classical foundations to its dynamic future.

I congratulate the editorial team and our students for their dedication and enthusiasm in bringing this edition to life. May *Civil-olve* inspire us all to think critically, innovate responsibly, and evolve continuously because civil engineering is not just about building structures, it is about building futures.

Warm regards,

Dr. Sameer S. Sawarkar
