

I am student of Civil Engineering Department from PCCOE & R passed out in 2020-21. Currently working as EXECUTIVE/PROJECTS in Torrent Gas Pune Limited.

College T&P department is working hard to get more and more industries in the college campus for placement. They really offer you large range of companies collaborating with different industries.

I received an offer from a core company which is very much valuable for students who are studying in core branches. They start training you from 2nd year for soft skills and communication skills. They really listen to the students suggestions and always try to implement them.

Apart from T&P Civil Department helped me to improve my skills and knowledge regarding the construction industry by providing number of guest lecturers from industry experts. We got the opportunity to do an internship in **Bangalore Metro Rail Corporation Limited** which was very much informative and helpful for our career building. I am always thankful to our college for giving so much in my three years of college journey.
